# Preface

The *sebayt* of Ptahhotep, often called the "instructions" or "maxims" of Ptahhotep, is amongst the oldest complete work of wisdom literature that survives today.

The skill of the Ancient Egyptian scribes, engineers and artists have long captivated me. Their religious devotion to producing the finest quality of work is mind-boggling to the modern observer.

When I first began to explore the reading and writing of hieroglyphs I quickly noticed that, despite the ease of modern printing and digital artwork, many translations of Ancient Egyptian writings are presented in plain text, and those with hieroglyphs or hieratic text included use colourless or crude representations. They also tend not to be accompanied by images, even when the originals were.

I could not help but wonder how the ancients would make use of modern technology, and felt that they would strive to create considerably more beautiful renditions than we ordinarily do. What better work to attempt this with myself than Ptahhotep's teachings?

As a software engineer of some experience I produced for myself a "proof-of-concept" tool to render hieroglyphic text with support for coloured glyphs and automated layout. I quickly found a set of coloured glyph images for another tool made by an enthusiast, which I could recycle for my own purposes. The colours did not adhere to the ancient standards, and some glyphs were transposed or poorly rendered, and so I created a modified version of the glyph images the use of myself or others which remedied these mistakes.

Although I originally planned to do much more work, striving to create something perfect, or at least to a very high standard, I realised that I had enough tools and experience to attempt production of an illustrated interlinear translation of Ptahhotep's work.

My skill with the ancient language is not fully developed yet, but with the help of dictionaries and others whose skills far surpassed mine the goal seemed achievable.

The original is rendered in hieratic text on papyrus using red and black ink. This rendition uses hieroglyphs, which seem to me to be the modern "high quality" and print-equivalent to the hand written hieratic of the ancient scribe. This is how the ancients rendered text on monuments and funerary goods where the highest quality was desired.

So here we have my attempt at a beautiful, faithful and useful copy and translation of the *sebayt* of Ptahhotep as found in Papyrus Prisse.

## Introduction

### Ptahhotep's Lament

Ptahhotep addresses his king, Djedkare Isesi and describes his plight, which is the suffering that comes with old age.

This is relevant to why he would want to pass down his wisdom as part of his legacy, and helps serve as an introduction to the rest of the text.

1 - The title *imi rA* is usually translated as "overseer" but is a pun around the *r* glyph having the shape of the mouth and being used for terms related to words and speech, and may mean something like "commander of words" or "commander through words".

2 - The *niwt* sign can also determine a place, a town or other settlement and the choice of the word city is to convey a modern equivalent to this title.

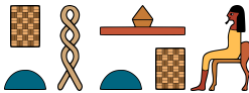

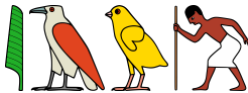

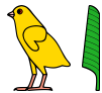

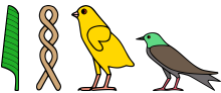

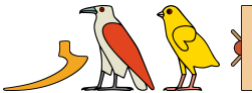

3 - The title of *TAti* translated as "vizier" is a somewhat modern projection here, it could perhaps also be translated as "prime minister", or as a "second in command" to the king.

4 - *Xprw* is closely related to the god Khepri, who symbolises the making of progress of the sun when it rises.

5 - *wr* as a determinative seems often to be used with concepts associated with *isfet*, as well as being a word on its own which is usually translated to mean "great" or "old". e.g. *Hrw wr* for "Horus the Elder" and *mHt wrt* for "the Great Flood"

6 - This appears to be a spelling mistake in the original.

7 - *iw* is a particle with no direct translation in English.

Ptahhotep continues to lament his old age, describing and analogising his difficulties.

8 - This appears to be a spelling mistake in the original.

9 - Literally "all suns", *rA* meaning "sun" and *nb* used as a suffix meaning "all". *rA* is identical in spelling and form to the name of the sun god Ra.

10 - The *-ti* and *-wi* endings signify duals, which are here translated by saying "both", whereas in English one might say "the eyes" or "the ears". In the original hieratic the singular signs are duplicated to convey the dual, and so the transcription here does the same.

11 - *ib* is directly translated as heart, but the ancient Egyptians considered the heart to be the seat of intelligence and decision making, much as we today think about the brain.

12 - The word *r* seems to be used for both the mouth and for speech.

13 - Speech is only implied, this construct seems to mean something more like the colloquial or artificial english construct "wording" or "to do words".

Ptahhotep's lament continues.

14 - This reading is uncertain.

15 - This is not an obvious translation, and the pieces referred to are not explicitly body parts. This could also be translated as places or things, although the usual word for things is *xt*.

Ptahhotep's lament continues further.

16 - This is a spelling mistake of *ni* for *n*.

17 - The plural mark Z2 is vocalised as *w*.

18 - It is slightly uncertain if the reading is *xt* or *xtw*, since the *w* is often absent as are the plural marks. This word occurs frequently in offering formulae. This kind of construct is called a "false plural".

19 - List of terms without conjunctions are infact lists, and so "and" is implied.

## **Ptahhotep's Request**

Ptahhotep's lament is complete, and he requests permission to instruct his son in the inherited wisdom of his ancestors.

20 - *pAw* is actually more of a past tense marker, but the translation given here fits.

<b>wD w t Y1</b>	<b>n</b>	<b>bA k i m</b>	<b>ir t</b>	<b>md iAw A1</b>

Ptahhotep expresses hopes that his king, Djedkare Isesi, experiences suffering driven from his people, and receives their support.

21 - The dual marker Z4 is vocalised as y

22 - The shores referred to are those of the Nile, and the unity of both of them is a way of referring to the land of Egypt.
